SKILLS

- Machine Learning
- Deep Learning
- NLP
- SQL
- Python
- POWER BI

LANGUAGE

- English
- Tamil
- Sowsashtra

ABOUT ME

I am an enthusiastic Computer Science undergraduate with a strong interest in AI, Deep Learning, and Data Analytics. I am looking for a job as data science domain . I'm eager to learn through hands-on problem-solving and enjoy working with others to tackle real-world challenges.

PROJECTS

CAR PRICE PREDICTION SYSTEM

- Developed a machine learning model to predict used car prices based on features like mileage, brand, fuel type, and engine specifications.
- Performed data cleaning, preprocessing, and feature engineering to improve model performance.
- Trained regression models to achieve accurate price estimation and reduce prediction error.
- Implemented the project using Python and ML libraries for end-to-end prediction workflow.

Sentiment analysis project

- Built a Natural Language Processing (NLP) model to classify text reviews into positive, negative, and neutral sentiments.
- Applied text preprocessing techniques such as tokenization, stopwords removal, and vectorization.
- Trained classification models to analyze user opinions with improved accuracy.
- Implemented using Python and NLP libraries to process and evaluate real-world text data.

Tesla stock price prediction

- Built a Tesla stock price prediction model using LSTM Deep Learning techniques on historical stock market data.
- Cleaned and prepared the dataset by performing preprocessing, normalization, and sequence generation.
- Analyzed stock market trends and evaluated the model's prediction performance using visualizations and error metrics.
- Used Python libraries such as Pandas, NumPy, TensorFlow/Keras, Matplotlib, and Scikit-learn for development.

EDUCATION

Bachelor of Engineering - ADHIPARASAKTHI COLLEGE OF ENGINEERING

computer science and engineering ,
cgpa-8.1 until 7th sem

2022-2026

Mastering in AI ML -GUVI
